RESEARCH INTERESTS

My research investigates the cognitive processes underlying second-language and bilingual language processing. Integrating methods from psycholinguistics (e.g., eye-tracking, self-paced reading), cognitive neuroscience (i.e., event-related potentials and oscillations), sociolinguistics (i.e., corpora, personal social networks), and computational linguistics (e.g., active learning, ASR modeling), my work seeks to characterize how the contextual, social, and interactional dimensions of (bilingual) language use are modulatory of real-time language comprehension and production. My research program also considers how variability in linguistic experience across the lifespan may interact with attention, memory, inhibitory control, and Theory of Mind. At its core, my research champions socially embedded, contextualized approaches to language processing, cognition, and computation.

EDUCATION

2023–present **Ph.D. in Spanish (Hispanic Linguistics)**
University of Florida
Committee: Jorge Valdés Kroff (co-chair), Edith Kaan (co-chair), Eleonora Rossi, Diego Pascual y Cabo, M. Carmen Parafita Couto
Dissertation: *Code-switching in context: A field-to-cognition approach to experience-based variation in Spanish-English processing*

2021–2023 **M.A. in Spanish (Hispanic Linguistics)**
University of Florida
Advisor: Jorge Valdés Kroff

2020 **B.A. with honors in Spanish and Music, *summa cum laude***
Ohio Wesleyan University
